MemorEyes 36 High Definition Digital Video Recorder

1 DESCRIPTION

MemorEyes 3G is a solid-state high definition digital video recorder for those conducting intelligence-gathering operations, especially in demanding environments such as on-board rotary wing aircraft.

The device has no moving parts and has a large recording capacity (several hours of video). It features a rugged machined aluminium housing, integral heating and cooling mechanisms, tactile button operation, and Dzus fastener system.

MemorEyes 3G has several features designed to increase the effectiveness of surveillance and security systems, including:

- Ability of simultaneous recording and independent playback of recorded video footage;
- Simultaneous recording of up to 4 CVBS or 2 SDI channels;
- Ethernet streaming of recorded and played back video;
- Tamper protection by watermarking recorded video with date/time stamp.

MemorEyes 3G may be used in conjunction with Laserdyne's Black Opal family of flat panel display systems, allowing the operator to:

set different video channels for recording or playback;

control playback; and

set event markers;

all without ever touching the MemorEyes 3G device – so you have a wide choice of installation sites within the vehicle.

MemorEyes 3G may also be used as a stand-alone recorder, utilising the local record and playback controls. Full control of the device is provided locally via the Graphic User Interface (GUI), a combination of AMOLED display, rotary switch and 4 momentary buttons. The main control modes are:

Debrief;

Play;

Stop;

Record: and

Record Mute.

The device may be installed:

in series with a Black Opal display (when in close proximity to it – only one short cable extra required, no other cabling changes); or

peripheral to a Black Opal display (when remote from it – some extra cables and cable modifications required).

MemorEyes 3G may also be installed in series with or peripheral to other brands of display, depending upon video signal availability and other features of that display, or it may be installed in a stand-alone fashion, if replacing an existing recorder or installing without a display.

Video footage is broken up and is stored in files of a configurable length. The video files are marked with start time and date. Files are stored on a non-volatile medium with data retention of 10 years.

MemorEyes 3G also features a waterproof external USB memory module, where video recorded to the fixed internal storage medium is duplicated. More than one may be carried to allow quick memory swap-out and mission continuity, retrieving files in between mission stages (e.g. during crew change/refueling stops).

The MemorEyes 3G DVR is field upgradeable. All software and firmware can be loaded via the Ethernet or RS-232 interface.

2 SYSTEM SPECIFICATIONS

Notation - use of brackets in tables: [notes & qualifications] (units) {alternate units}.

2.1 System Performance

PARAMETER		SPECIFICATION
	Genera	al
Local Controls		4 tactile LED-backlit (green or red selectable) buttons, 1 five-position rotary switch
Remote Controls		RS-232
		1000BASE-TX Ethernet
		Dimming and Day/Night control lines
Indicators		160x128 AMOLED display
		MIL-STD-3009
Night Vision Device Compatibility	y	RTCA/DO-275
		[low intensity green; red selectable]
	Recordi	ng
Video Format		H.264 BP, MP, and HP up to Level 5.1
Video Bit Rate		1Mb/s - 40Mb/s
Audio Format		AAC
Audio Bit Rate		24Kb/s
Internal Storage		128-1024GB SATA SSD
Recording Capacity		>6 hours at 40Mb/s
	Inputs	S
	SD Video	4 simultaneous CVBS channels
	3D video	75ohm terminated and ESD protected
Physical Connections	SDI Video	1 or 2 simultaneous channels
Physical Connections	JDI VIGEO	BNC, 75 ohm, ESD protected
Audio		2 channels, ESD protected
	SD Video	1V _{pp} Composite [PAL/NTSC]
Signal Formats supported	SDI Video	SMPTE 259M, SMPTE 292M, SMPTE 424M
	Audio	3.3Vpp [max.]

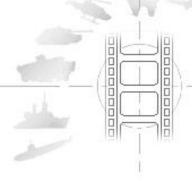

File: PS-ME-S-5017-C 1	Author(s): TW, AK	Authorised: TW	Rev. Date: 19/02/16	Page 2-1

MemorEyes 3G High Definition Digital Video Recorder

PARAMETER		SPECIFICATION		
Outputs				
	SD Video	1 CVBS channels		
	JD VIGEO	75ohm terminated and ESD protected		
Physical Connections	SDI Video	2 channels		
Physical Connections		BNC, 75 ohm, ESD protected.		
	Audio	2 channels		
	Addio	ESD protected		
	SD Video	1V _{pp} Composite [PAL/NTSC]		
		SMPTE 259M, SMPTE 292M, SMPTE 424	М	
Signal Formats supported	SDI Video	Output 1: Re-clocked copy of the SDI1 input channel (same format as the input)		
		Output 2: Any selected input (any format)		
	Audio	3.3Vpp [max.]		
Safety & Protection				
Cooling		thermal transfer by internal & external convection		
Backfill		purged & backfilled [N ₂]		
Electrical Protection		conforms to:		
		QSTAG 307;		
		MIL-STD-704E;		
		MIL-STD-1275D;		
		RTCA/DO-160E ¹		
Audible Emission [@ ≥ 10m]		nil		
MemorEyes-to-G	o External Waterp	proof ("Walk Away") Memory		
Туре		solid state ["thumb drive"]		
Capacity (GB)		128/256/512		
Interface		USB 3.0, mass storage device		
File System		FAT32, NTFS		
Sealing		water proof when inserted into MemorEyes 30 capped	or و	

 $^{^{\}rm 1}$ Refer to Laserdyne for applicable issues, clauses & tests.

MemorEyes 36 High Definition Digital Video Recorder

3 SET-UP

3.1 Mounts

The MemorEyes 3G has two methods mounting:

four mounting points, being type PFSC35 Dzus fasteners, located in the corners of the mounting flange; and

eight M4 tapped holes, 4 in each side.

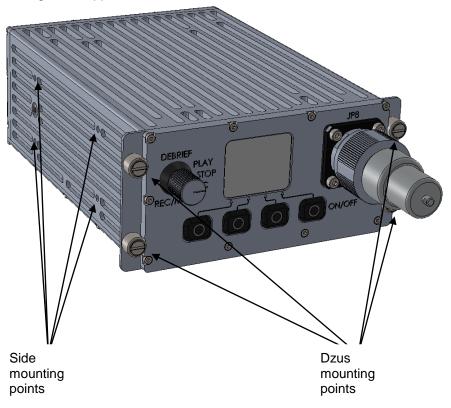

Figure 3-1: Mounts

3.2 Connections

The MemorEyes 3G has nine connection points, being:

on the rear of the unit;

Connector JP1, the Display (RMU) Video & Power Connector,

Connector JP2, the Sensor Video Connector,

Connector JP3, the Reclocked SDI Video Out [pass-through] Connector,

Connector JP4, the SDI Video Out [play-back] Connector,

Connector JP5, the Primary SDI Video In Connector,

Connector JP6, the Secondary SDI Video In Connector,

Connector JP7, the Ethernet RJ45 Connector,

Connector JP9, the Earth Point (if provided), and

on the front of the unit;

Connector JP8, the Removable Memory Connector.

Figure 3-2: Connections

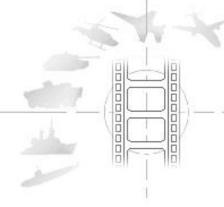

3.3 Set-up Procedure

CAUTION: User-supplied cables must be correctly wired (see list of Connector/Pin Details).

Ensure that external power is within the range specified herein.

Ensure that external power is OFF before proceeding with set-up.

- Mount the unit to the vehicle or platform, using the four Dzus fasteners provided.
- Connect the earth point [if provided (configuration dependent needed only if video and comms connections are direct to the unit not via a display)] to an appropriate point on the vehicle.
- Connect the required cables to Connectors JP1 to JP6, and to the external imaging system, power source and display (JP7 need only be connected when the Ethernet connection is required, e.g. for download of video files).
- Ensure that the external memory module is firmly seated into and sealed to JP8.
- See User's Manual for other connection configurations.
