

**MOBILTECH**

## SLA 2000-LI USER NOTES

- This unit can be used for testing both General Aviation 'HIGH IMPEDANCE' HEADSETS and 'military' LOW IMPEDANCE HEADSETS.
- TO TEST HIGH IMPEDANCE HEADSETS: Mic and Headphones, must both be plugged-in for proper testing. Be sure that plugs are in-tight.
- TO TEST OR COMPARE: Depress RED PTT button. Listen for sound level, audio quality, and check for "Hiss" and "Cracking".
- TO FIND INTERMITTENT CONNECTIONS: Shake the connected headset cords while listening over the headset for any audio "BREAK-UP".
- TO TEST LOW IMPEDANCE HEADSET: Plug your low-impedance headset into the "Helicopter" plug and follow the above listed instructions for "Test".
- Change the unit Battery after 8 Hours of PTT Operation.
