

# Product Summary

## MemorEyes-to-Go Removeable "Walk Away" Memory

Solid State  
**MemorEyes**  
Video Recording  
Technology

Recall Your Vision!

*"Solid state digital  
video recorders -  
recall your vision."*

### Suitability

compact, removable WAM ("Walk Away Memory") solid state storage device specific to the MemorEyes video recording system; records video as a removable alternative to the MemorEyes main internal storage medium; more than one may be carried to allow quick memory swap-out and mission continuity.

### Recording

up to 3 hours of full frame-rate video at highest quality (lowest compression); storage equals the MemorEyes internal capacity at the same settings.

### Other

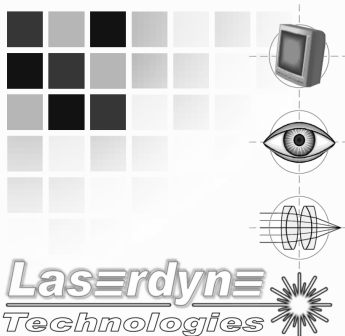

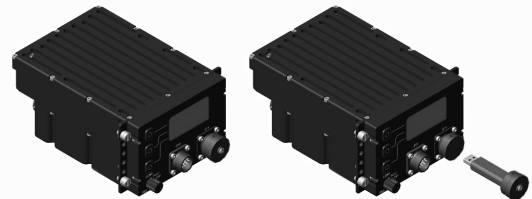

type	solid state ["thumb drive"];
capacity	16GB;
interface	USB 2.0 high speed, mass storage device;
file system	FAT32;
sealing	water proof when inserted into MemorEyes or carry tube.

MemorEyes-to-Go =  
removeable WAM  
("Walk Away Memory");

MemorEyes = solid-  
state video recording  
system.

### Dimensions

diameter	28 mm;
length	79 mm;
mass	60 g.
when in carry tube
