The TDAP-611 is the Next Generation in Mission Audio

The ALL-NEW TDAP-611 analog audio panel leapfrogs analog audio into the 21st century. Based upon new thinking and new technology, the TDAP-611 offers the clean, clear sound you expect from Technisonic, while eliminating unneeded size and complexities.

New Key Features

- New digital softkeys
- Integrated controls
- Agile legends
- Selectable crew isolation

Enhanced Capabilities

- COMS (8) switched
- Directs (3)
- Alerts (3)
- NAVS (6) Switched
- PA's (1) Switched
- ICS Tie (2) Switched

Physical Characteristics

- New smaller height requirement at 2.24"
- New shallower depth at 4.59"
- New lighter weight 2.23 lbs
- New brighter display 2nd Gen LED Distribution
- Headset Power 1.8 W into (7) distributed users
- Contains new 2nd generation LED lighting boards providing both greater and conformal lighting across the unit and spectrum. All user controls are fully illuminated for NVG lighting.
- Turn and grip rotary controls can be easily glove operated, despite the high control density.
- Since no two operators seem to have the same radio complement, the entire TDAP control suite has agile legends, easily changed at any time, and a predefined assortment based on hundreds of customer requests is included with every system.
- The unique dual ICS allows crew isolation at the pull of a knob, allowing passengers or crew to isolate themselves or their pilots with a single, simple action.
- Simple conformal connections allow the TDAP-611 to replace, or coexist in an existing A711 installation with minor modifications.
- Easy support of Simulcast operations by simply enabling multiple Com ports at the touch of a button.

Brighter & Lighter, the TDAP-611 also features digital softkeys

MORE CAPABLE. LESS COST.
